Education

2010-2014

Engineering Faculty, B.Sc. in Civil
Sakarya University

2005-2009

Mehmet Niyazi Altug Anatolian
High School

Skills

- Swift
- SwiftUI
- Combine
- MVVM-C
- CoreData
- CI/CD (Bitrise)
- AVFoundation
- MLKit
- XCTest
- UIKit
- async/await
- VisionKit
- ARKit
- VIPER
- Dependency Injection

Apps

- TKPay
- Ziraat Mobil
- BiTaksi
- Supersense
- ReadBit (SwiftUI)
- Stily
- 3ToGo

Oğuz Öztürk

Senior iOS Developer

Senior iOS developer with 7 years of experience, focused on fintech: payment SDKs, mobile banking, and camera-based KYC. Currently building a payment SDK embedded in Turkish Airlines and AJet iOS apps, serving millions of users. Background in computer vision products (OCR, accessibility) and map-based consumer apps.

Experience

OBSS - TKPay iOS SDK (Senior iOS Developer · 01/2025 - Present)

- Building a payment SDK embedded in Turkish Airlines and AJet iOS apps, covering wallet top-up, QR payments, campaigns, and KYC on Miles&Smiles infrastructure.
- Built the 3D Secure card payment flow end to end.
- Contributed to camera-based KYC: on-device MRZ/passport scanning with OCR reliability improvements (blur detection, multi-frame consensus).
- Co-designed the SDK's analytics event queue with Keychain-based multi-user token handling.
- Tech: MVVM, Swift Concurrency (async/await), injected network/repository layers, 80% unit test coverage. 99.5% crash-free, 12.5 MB framework footprint.

Roofstacks - Ziraat Mobil (Senior iOS Developer · 02/2024 - 01/2025)

- Developed the investment module of Ziraat Dynamic Banking: stock trading, portfolio and P&L screens with data-heavy charting (DGCharts).
- Integrated SEAL SDK across Ziraat Bank iOS apps.
- Rebuilt core UI flows, including the app's login experience, as part of Ziraat Bank's digital transformation.

BiTaksi (iOS Developer II · 07/2023 - 12/2023)

- Worked in a 15+ person agile team on one of Turkey's leading ride-hailing apps.
- Implemented deep linking and dependency-container-based modular architecture.
- Maintained CI/CD pipelines on Bitrise; led code review sessions.

Mediate Tech. (iOS Developer II · 11/2020 - 06/2023)

- Developed Supersense (AI assistive app for blind users) and ReadBit (camera-scan + text-to-speech reader) at an MIT-spinoff computer vision startup.
- Built on-device OCR and object recognition features with VisionKit and ML Kit; full VoiceOver accessibility support.
- Worked with SwiftUI & Combine from iOS 13, with Core Data for local persistence; integrated AWS, Azure Cognitive Services, and Firebase.
- Wrote and maintained unit tests across both products.

Improver Digital Tech. (iOS Developer · 07/2020 - 10/2020)

Developed Stily, a social fashion platform for Doğan Medya, on an MVVM-C architecture.

3ToGo (iOS Developer · 04/2019 - 06/2020)

- Developed route creation and navigation features with Google Maps API.
